

FOI REQUEST NO. LEX3041

Request for:

- “A list of the identifiers of foreign objects received in ballot boxes, and a description (if any) of each foreign object. Please ensure that the cases where no description was noted, but a foreign object was received, are identified as such. Here, "foreign objects" are all objects received in ballot boxes that were not ballots.
- The current 'playbooks' that the AEC have which include the procedural response to a foreign object in a ballot box. That is: the pre-established methods and procedures that are enacted upon receipt of a foreign object.”
