Complaint Details

There is a social media page on Facebook named "Bass Deserves Better", posting and sharing union political messages. the page is run by a known senior union member 47F [REDACTED] (who is a Industrial Organiser at CPSU Tasmania) , as found by scrolling through hundreds of posts I found that 47F [REDACTED] was running it. The page is misleading as it being used to campaign against the Liberals and conservatives, on the premise that Labor is the only party to support.

The issue is, the page is clearly being run by union members as away to reach voters in 'Bass', but has no 'authorised' message anywhere on the page. For the average voter they would see this page as being run by an apolitical group, but that is not the case.

Should this page be authorised by either Greene or the Union? As is the case with other union campaign pages.

Expected Outcome

Should this page be authorised, or is it exempt, if so how come? reach out to the

group by telling them they are required to be authorised to stop misleading voters that they are apolitical.

BASS

Bass deserves better True! I was considering a name change... I'll be focussing on State issues now that **47F** is out! Bass deserves better than **47F**, **47F** and **47F**
