s47F

I am happy for this to go out to EIAT today from the mailbox.

Please include the more detailed explanation in Jeff's pack for Wednesday.

Cheers

Hi s47F

Andrew has now approved a revised version of this being shared with EIAT, as below. We've further modified this to strengthen the emphasis there was no compromise, and removed unnecessary detail about the AEC's internal response. It is primarily the targeted nature of the content that should be relevant for EIAT's purposes.

Dear EIAT members

For your information and awareness, we would like to bring to your attention a recent 'spear phishing' email campaign at the AEC. The detail of these emails is below.

AEC systems were **not** compromised in any way. We believe this is worthwhile sharing with the EIAT on the basis that despite being contained by the AEC, the campaign appears targeted and somewhat sophisticated. It is possible it relates to the proposed referendum given the targeting of AEC's Indigenous Electoral Participation Program mailboxes. s47F

It is a reminder that the cyber threat environment for the proposed referendum is unlikely to be lower than for a federal election.

Email details

On 14 November 2022, at 22:52, a series of emails were sent to the AEC's eight IEPP mailboxes, from the falsified email address support[@]aec.gov.au, with the subject '[email address] have 12 Pending incoming emails'. The list of recipients is as follows:

- indigenous@aec.gov.au
- indigenous-sa@aec.gov.au
- indigenous-wa@aec.gov.au
- indigenous-vic@aec.gov.au
- indigenous-tas@aec.gov.au
- indigenous-qld@aec.gov.au
- indigenous-nt@aec.gov.au
- indigenous-nsw@aec.gov.au

Hi Andrew

I think s47F may have discussed this with you.

Are you supportive if we notify EIAT members of this incident? The benefit would be to ensure EIAT members remain alert to the threats in the referendum environment and particularly reinforce that it is not necessarily a lower cyber threat environment compared to a federal election.

We would propose sharing the incident summary below (happy if you have a more recent version) and introduce it along the lines below so as not to alarm anyone or otherwise imply that the AEC was compromised.

Dear EIAT members

For your information and awareness, we would like to bring to your attention a recent 'spear phishing' attempt at the AEC. The incident summary is below.

AEC systems were **not** compromised in anyway. The attempt appears targeted and somewhat sophisticated. It is possible it relates to the proposed referendum given the targeting of AEC's Indigenous Electoral Participation Program mailboxes. ▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓ s47E ▓▓▓▓

It is a reminder that the cyber threat environment for the proposed referendum is unlikely to be lower than for a federal election.

Grateful for your thoughts.

Regards

Good Morning

Please refer below for a high level summary that consolidates yesterday's incident response so we are all on the same page as to what happened including the resulting mitigation actions. While the incident has now been closed from a response perspective, ██ s47E
██ .

The nature of the targeted phishing campaign and the resulting incident response may make an excellent case study for broader awareness activities in the future.

Let me know if additional information is required and note we've purposely left the more technical details out of this summary.

Regards

Andrew
